### SUMMARY

Informatics graduate (S.Kom, ITB STIKOM Bali, 2026). Freelance full-stack and automation developer since 2023 — three apps currently live on Vercel and 50+ automation bots delivered for clients. Daily stack: Next.js/React, Node, Python, PostgreSQL, and LLM APIs (OpenAI, Claude, Gemini) for agents and workflow automation. Builds with AI tooling daily and owns the architecture, review, and deploys. Looking for an AI full-stack / automation role in Malaysia; ready to relocate with an employer-sponsored Employment Pass.

### CORE SKILLS

**Languages:** TypeScript, JavaScript, Python, PHP, SQL

**Web:** React, Next.js, Node.js, Tailwind CSS, REST APIs, Prisma, PostgreSQL (Neon), MySQL, Supabase

**AI & Automation:** LLM APIs (OpenAI, Claude, Gemini), AI agents & tool-calling, prompt engineering, Playwright scraping, Telegram/web bots, scheduled jobs

**Delivery:** Git/GitHub, Vercel, env/secrets hygiene, staged releases

### EXPERIENCE

#### Freelance Full-Stack & Automation Developer — Independent | 2023 – Present · Bali, Indonesia

- Build and run web apps, scraping pipelines, and internal tools for clients, from requirements through deploy and support.
- Built 50+ automation bots (Python, Node.js, Playwright) for bulk processing, Telegram/web flows, and multi-account operations.
- Use LLM APIs for structured data extraction and agent workflows; everything gets human review before release.

#### Full-Stack Developer & Video Editor (Contract) — Mellogang Visuals | 2025

- Built the agency's ordering and production-tracking system: role-based access (Admin/Editor/Client), payment verification, and scheduling — PHP, CodeIgniter 4, MySQL, React/Tailwind.

### SELECTED PROJECTS

**QuestPay — Web3 creator checkout** · Next.js, TypeScript, Neon — [kenshi-questpay.vercel.app](https://kenshi-questpay.vercel.app)

Built and run solo: UI, database, payment/release flow, production deploy.

**Kenshi Notes — notes web app** · Next.js 16, Neon Postgres — [kenshi-notes.vercel.app](https://kenshi-notes.vercel.app)

Obsidian-style notes app backed by a persistent Postgres database.

**Ganga Schedule Universal — schedule product** · TypeScript, Next.js, Neon — [ganga-schedule-universal.vercel.app](https://ganga-schedule-universal.vercel.app)

Class-schedule web app with a seasonal UI; schedule data stored in Postgres.
